

PRIYANKA C METI

AI Data Analyst — SQL, Python, Power BI — Machine Learning & Data Automation

priyankacm26@gmail.com — +91 9148358436
LinkedIn — GitHub — 3D AI Portfolio

Summary

AI Data Analyst with experience in SQL, Python, Power BI, and machine learning for solving business problems. Worked with 100K+ records to improve data quality, automate reporting, and deliver actionable insights through KPI dashboards, segmentation analysis, and predictive modeling.

Technical Skills

Languages: Python (Pandas, NumPy, Scikit-learn), SQL (Joins, Aggregations, Filtering, Basic CTEs)
BI & Visualization: Power BI (DAX, Data Modeling, KPI Dashboards), Excel (Pivot Tables, XLOOKUP)
Concepts: Machine Learning, Feature Engineering, ETL Pipelines, Data Cleaning, Data Validation, EDA
Tools: FastAPI, Streamlit, Jupyter Notebook, Git
Databases: MySQL, PostgreSQL

Experience

Data Analytics Intern — Infotact Solutions Jan 2026 – Apr 2026

- Processed, cleaned, and validated 100K+ records using SQL and Python, improving data accuracy by 25%.
- Built interactive Power BI dashboards using data modeling and DAX to track KPIs and business performance.
- Automated data processing and reporting workflows, reducing manual effort by 30%.
- Developed SQL queries using joins, aggregations, and filtering to extract, validate, and analyze large datasets.
- Identified inconsistencies and applied validation rules to improve reliability of reporting outputs.

Data Analyst Intern — Rubixe Jan 2026

- Performed exploratory data analysis (EDA) using Python and SQL to identify trends and key insights.
- Cleaned, transformed, and structured datasets to improve usability for reporting and analysis.
- Assisted in dashboard creation and reporting for performance monitoring.

Projects

Hotel Booking Prediction System Live

- Analyzed 100K+ booking records to identify drivers of cancellations and customer behavior patterns.
- Built classification model using feature engineering and evaluation (85% accuracy on test data).
- Identified high-risk bookings to support operational planning and revenue optimization strategies.
- Developed Streamlit-based dashboard for real-time prediction, reporting, and KPI tracking.

AI Health Data Pipeline

- Designed ETL pipeline for processing structured health datasets.
- Implemented validation checks to ensure data consistency and integrity.
- Built FastAPI-based system for real-time data ingestion, processing, and reporting.

Case Study

Lead Quality Optimization (3,000+ Leads Dataset)

- Analyzed lead dataset to improve advertiser ROI and support a 20% CPL increase opportunity.
- Improved lead quality from 44.6% to 49.2% (+4.2pp) using segmentation and filtering strategies.
- Identified high-performing segment: High PhoneScore + Medium Debt (54% quality).
- Performed segmentation analysis and KPI tracking to identify key performance drivers.
- Built data pipeline: CSV ingestion → data cleaning → feature engineering → dashboard insights.
- Provided data-driven strategy balancing lead quality and volume for campaign optimization.

Education

B.E. Electrical & Electronics Engineering 2021–2025
BLDEA Engineering College, Bijapur CGPA: 8.6
